

AMMO-GUARD 22

CORROSION PROTECTION FOR ARMS & AMMUNITION

Description

Ammo-guard 22 is a Multi-Metal Volatile Corrosion Inhibiting product used mainly for enhancing shelf-life of arms and ammunition. The Ammoguard 22 card releases vapors of corrosion inhibitor molecules that form an invisible & passive layer on metal that resists corrosion.

Arms and ammunition are made of multiple kinds of metals such as copper, brass, steel, aluminum, zinc and chrome platings etc. that can corrode over time. This can result in failures and accidents during use.

Application

The Ammo-guard 22 can be placed with the metal parts to be protected such as bullets, guns, pistols etc. These should be placed in the closes possible vicinity to the product to be protected.

In case of bullets these should be placed below or above the rack of bullets facing the non-printed side towards the bullets.

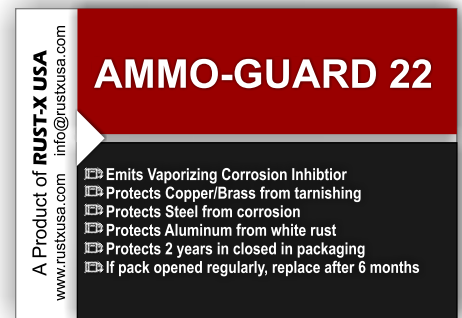

For guns & armament, these cards should be placed beside the guns in a way that the vapours from the non-printed side get enough space to get released.

Specifications

Size	50 X 70 mm
Thickness	400 microns
Colour	Red & Black
Protects	Copper, Brass, Steel, Zinc, Chrome, Aluminum
Volume Protected	200 cm ³

Packaging

Box of 50	50 cards in an air-tight re-closable box
Box of 500	500 cards in an air-tight re-closable box
